

Khas Learn

About KHAS Learn

KHAS Learn is a learning management system that provides to create and apply activities for educators. Educators can communicate with students, share course materials, create assignments and exams, and manage discussions through blackboard.

The students can reach KHAS Learn and attain out-of-class activities anytime from anywhere with an internet connection. Therefore, the learning process of the students can be improved anytime by a new out-of-class activity created by the instructor.

A learning management system is used to support distance education in many universities, however, KHAS Learn supports the face-to-face courses in our university. By this system, there is a better communication between educators and students, the contents of the courses can be improved, and the courses can be enriched by several out-of-class activities.
